GILLWARE ONLINE BACKUP ANNOUNCES FULL INTEGRATION WITH FUJITSU SCANSNAP SCANNERS

MADISON, WI, Oct. 30, 2012 –Gillware Data Services, Inc. and Fujitsu Computer Products of America, Inc., the market leader in document imaging scanners and services, today announced that [Gillware Online Backup](#) is now fully compatible with the entire line of Fujitsu ScanSnap scanners.

Gillware Online Backup automatically compresses and encrypts a copy of any document created by a ScanSnap scanner and sends it to a secure U.S. based data center. A 2 GB account is free to use. Gillware Online Backup integrates seamlessly into Windows operating systems, and can be customized to back up any file types, files or folders the user would like to protect.

“Gillware Online Backup is designed to be as easy and intuitive as Fujitsu ScanSnap scanners,” Gillware Data Services President Wesley Gill said. “This partnership allows offices to go paperless or make electronic documents with ease and peace of mind.”

“Fujitsu is focused on providing the most innovative document imaging solutions on the market,” said Scott Francis, vice president of marketing, Fujitsu Computer Products of America, Inc. “Working with companies such as Gillware Data Services provides customers with additional advanced functionality to help streamline business operations and help office workers become more productive and efficient when utilizing ScanSnap scanners to digitize their documents.”

Fujitsu ScanSnap scanners combined with Gillware Online Backup provides a powerful, affordable, and compact solution for increased business productivity and efficiency.

For more information on the Fujitsu ScanSnap product line, please check it out at <http://us.fujitsu.com/scansnap/>, or visit the ScanSnap Community site at <http://scansnapcommunity.com/>.

About Gillware Data Services

Gillware Data Services was founded by Gillware, Inc., one of the world’s leading data recovery labs. Gillware Online Backup is the only backup solution developed by a data recovery laboratory. It was

designed with a full understanding of what best protects data. It is automatic, secure and reliable. Data is compressed and encrypted and remains encrypted at a U.S. based data center.
